

These halogen replacement & AR111 LEDs will bring a warmth to the heart of any room.

In addition to more effective lighting than provided by other lights they immediately offer major cost savings over halogen lights with running costs that can be 80% lower.

As with all Surelight LED systems these are eco-friendly and low maintenance.

RGB and pastel colours provide further options if mood or feature effect lighting is needed.

Typical uses for down-lighters include:

- **Retail Display Lighting**
- **Offices**
- **Workshops**
- **Residential**
- **Hotel & Bars**
- **Clubs**

Halogen Replacement LEDs - Down-Lighters

6 LED Down-Lighter

The 6 LED Down-Lighter is a compact LED fitting suited to down-lighting applications.

It has been designed with excellent thermal properties and efficiency in mind. Used with the correct driver this light will meet part L requirements.

The 6 LED Down-Lighter has a built-in tilting gimble to give a wide range of adjustment.

A range of anodised finishes are also available upon request.

Halogen Replacement Lamp—K2MR16

The K2MR16 RETROFIT has been developed to offer the end user an LED-based solution to the standard halogen dichroic lamp.

The K2MR16 RETROFIT has been designed to fit directly into any MR16 fitting.

As well as having significant energy saving benefits the K2MR16 RETROFIT is virtually maintenance-free having a standard life of 50,000 hours.

The unit is available in a range of single colours offering limitless combinations of desired effects.

Supplied complete with driver.

AR111 Lamps

The AR111 Retrofit product is a compact LED fitting suited to down-lighting applications.

It is available in an IP67 option for outdoor use upon request.

Typical applications for the AR111 light include retail display lighting, offices, workshops, residential, hotels, bar & club environments.

The AR111 Retrofit is available in various single colours, including warm, neutral and cool white. An RGB version is also available.
